

Pocket Thermometer

Waterproof thermometers - These digital T-shaped waterproof thermometers offer IP66 - IP67 protection. The waterproof thermometers are housed in a robust polycarbonate case and incorporate a probe that is ideal for heavy duty food processing and catering applications.

The thermometers measure temperature over the range of -49.9 to 149.9°C with a 0.1°C resolution. Each thermometer features a 10 minute auto power off facility, maximising battery life.

The waterproof thermometers incorporate a robust, stainless steel, penetration probe that measures Ø5 x 125mm with a reduced tip (Ø3.5 x 20mm) to improve response time.

They feature both max/min memory function and a display hold function.

The thermometers come in two probe lengths of 125mm or 300mm.

specification	T-shaped waterproof thermometer	specification
range	-49.9 to 149.9°C	range
resolution	0.1°C	resolution
accuracy	±1°C	accuracy
battery	1.5 volt LR44 button cell	battery
battery life	5000 hours	battery life
display	12mm LCD	display
dimensions	30 x 88 x 170mm	dimensions
weight	50 / 60 grams	weight
specification	T-shaped waterproof thermometer	specification
range	-49.9 to 149.9°C	range
